

# The Little Black Book of Money Secrets, Strategies, & Shortcuts

(AKA: The Tycoons Playbook) (AKA:Cracking the Millionaire Code)

**100 Million Not Penny Less! -Zero to 100 Million in no time flat.**

**If you know what your doing, you don't need a lot of time, space, or money.**

**It's crazy, most people would rather work hard for 60 years, retire broke, and depend on the government for scraps, than to take 15 minutes to learn how to become financially free and live the ultimate leisurely lifestyle...**

**You are only ONE strategic resource from having all the money you want. 97% of opportunities never make any money...**

**You can do 999 things wrong; you only need to do 1 thing right; one right opportunity solves ALL FINANCIAL PROBLEMS IN YOUR LIFE...**

**You must make money while you sleep, or you will work till the day you die...**

**You must be responsible for your own productivity; a job is Just Over Broke. The owner takes 95% of the profits and pays you just enough to get you to come to work and be productive for them!**

# 17 Rules of Wealth Creation & Financial Freedom While Living the Ultimate Lifestyle

1. You need to operate through corporations. This is not only for your protection from taking anything you own personally but puts you in a position for generating millions of dollars in loans or profits. You want to own a business, not run it.
2. You need to generate passive auto pilot revenue, and multiple streams of it. If not, you will work till the day you die. You cannot depend on one single source of income. This is a fool's game. If you don't make money while you sleep, you will work till the day you die.
3. A JOB is Just Over Broke. Why would you want your boss to take 95% of the profits you generate for them? Wouldn't you want to spend more time with your loved ones and on things that excite you? Why would you want to die broke and a boss to tell you when you can go potty or pick up your kids?
4. You want to maximize your quality of life. You do this by having Ultimate Financial Freedom. Making enough money to sustain a high-quality lifestyle where you wake up in the morning knowing you are going to make money, whether you sleep in, go on your boat.
5. You want to wake up in the morning excited to start your day. Do you really do this with a Job so repetitive that it's the definition of insanity. Or a business where you work two eight-hour days, 7 days a week? Love what you do. Live your dream. Life is cool, jazz, flip flops, and endless winefests.
6. You must use Other People's Money to live the life you want. You do not have enough yourself, and if you did have it, why would you use your own? We have bankers in place to do this for you in many cases. Loans, Credit lines, Investments, whatever it takes.
7. It is crazy, most people would rather spend 50 years at a job or small business to stay broke, when they could spend an hour or two of financial education learning from someone who knows how to make you money while you sleep. Specialized financial education is the only thing you need to succeed. If you want money tomorrow, start yesterday.

8. Calculated Risk. You never get anywhere if you never move. Directed Action is the only way to get ahead. Do you really want to stand on the curb and just clap while the heroes walk by? Don't be an "average joe".
9. Mentors: You must surround yourself with the best mentors. A teacher can only help you maybe 500%, but a mentor, who has been there and done that, gives you successful strategies and systems, eliminates 20 years of mistakes and eliminates most of the headaches and hassles, the trial and error. A mentor gives you shortcuts.
10. Tax Strategies: You must have smart tax strategies. Taxes are the greatest destructor of wealth, but smart tax strategies can be the biggest wealth creator of all time for you. That is why operating out of a corporation, and using compound interest, understanding capital gains, makes the rich richer and you the same. Using compound interest and capital gains is the greatest wealth creator invented by mankind.
11. Success Formulas: You must have a success formula that never fails. A secret sauce, the free prize inside, technology accelerators, marketing that works. Whatever business you think you're in; you're in the marketing business.
12. Cashflow: You must spend hours to cashflow and profits. Money loves speed and time is your most valuable asset.
13. Morals: Your business or income channels must be legal, ethical, and moral, so you can sleep at night. Quality of life matters most. Your mate must be on board or you're going to have an uphill battle. We include legal documents.
14. You want to create generational wealth. Pass it on to your loved ones so they don't have to work a JOB for the rest of their lives. This happens with specialized knowledge, focus, continuing education, and paying attention to details. The devil is in the details.
15. One simple product can make you millions. We sold led light bulbs, a simple light bulb made tens of thousands a week. Even a simple Pencil makes many millionaires. Don't re invent the wheel, just create better versions. Just ask Apple Inc
16. You must have a "starving market" for your product or service and competition you can beat the pants off. If you have a good product the market will find you. 50% of businesses are incompetent and have bad customer service.
17. When you want success, you must focus on what you can give, not on what you can get.

# The difference between "ordinary" and extraordinary is that little "extra..."

We spend 1000s of hours investigating, researching, studying, evaluating, monitoring, and testing the 1/10<sup>th</sup> of 1% cherry picking the best ways to make large amounts of money, faster, 6-7-8 figures a year, not a \$30,000 income. All of these have that potential.

This is our edge!

Acres of Diamonds....

We found a HUGE gap in large liquidation outlets that sell all kinds of stuff cheaper because of our overseas suppliers. Up to 90% off- all new merchandise.

The current competition is Big Lots, TJ Maxx, Marshalls, Ross. But their model is totally different than ours. We get new in package brands, not returns.

That doesn't mean we don't use returns. They are profitable because there name brands, but they're not as cheap.

Here is the difference...

1. You keep the stock in boxes, or cartons, cut open, \*This gives the feeling of "cheaper" than anyone else.
2. You have over 10,000 items we offer, Gold leaf 6 pc sheet sets for \$3 for instance.
3. You have special prices on case items as well.
4. You can run it with 1/4 the staff of anyone else because of the way it's laid out.
5. You offer FOOD and homewares, clothing, etc. The food is canned, boxed, or another non-perishable.
6. We get warehouse space for a fraction of the costs using our negotiating processes.
7. With new inventory every day, clients a surprise every time they come in, and they want to come in more often.
